Profile

I am an enthusiastic and passionate developer/programmer who loves to write code, solve problems, automate stuff, and build websites & softwares. Experienced with the latest cutting edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team. I'm always looking forward to learn new skills and add them in the list.

Work Experience

Full Stack Developer, Landmark Technologies, Tirana

September 2021 — Present

- Reactjs in the front and Nestjs in the back, with Typescript.
- Fully engaged with team members to achieve the highest levels of productivity, to build an Multi Role based LMS and Online Course Provider.
- ANTd and Styled Components for design implementation, Redux for state management, Paypal for payment processing, Reacti18next for multi language application, Formik and yup etc.
- Created custom reusable components and hooks.

Senior Reactjs Developer, Icon Group - Icon Mobile, Berlin

January 2022 — February 2022

Worked on a short term project, on which the general idea was about Heating Value Optimization, creating graphs of the real data and also data after being optimized.

- The main technologies that I used on this project were: Reactjs for the UI, Redux for global state management - in case the project grows with time, and D3.js for chart creation.
- Implemented and updated application modules under the direction of Senior Software Developers.
- Worked to support the senior creative staff with day-to-day tasks.
- Documented all concerns and incidents and reported them to a senior supervisor.

Full Stack, MERN Stack Developer, Cartys, Freelance, Part Time

January 2021 — September 2021

- Worked well independently and on a team to solve problems.
- Organized and prioritized work to complete assignments in a timely, efficient manner.
- React Native with Expo to create Native Application, React Navigation v5, etc.
- Build re-usable components using Touchables control components and Flatlists
- Create a SPA with React and Material-UI, and Redux as a state management.
- Wrote custom hooks to get user auth object and other common pieces of data from Redux state.

Personal Projects

February 2016 — Present

1. **Fondacioni Deshmia.** A Donation App, created with MERN Stack and Stripe as a payment gateway for a single donation or monthly subscription. It has a Role based system where only Admin or Publisher can add new causes and news and update or delete them. Admin can approve other registered user to have status of a Publisher.
2. **Social Media App.** Built on MERN Stack. It includes authentication, profile and forum posts, with likes and comments functionality.
3. **API for a Boot camp.** Back end API created with Express and MongoDB for the Camp application to manage boot camps, courses, reviews, users and authentication.
4. **Pizza Ordering System.** A system created with React on the front, Express and MongoDB on server side. It is a Role based System (Admin and User), where the Admin creates menu and reviews orders made by users. Users can make orders as a guest or as a registered user which enables them to view their history of orders.
5. **Reddit clone.** Cloning Reddit with Next.js and Tailwind as front end frameworks, and Express, PostgreSQL and TypeOrm on the server side.
6. **A Portfolio** for a graphic designer & photo-shooter. Created with HTML, SCSS and JavaScript.
7. **GitHub Account.** Authenticate to GitHub and list repositories of your account or search for other user accounts.
8. **Notebook App.** Created with MERN Stack, Has CRUD functionality for notes and ability to categorize notes, it also has efficient search with debounce implemented.

Albanian

English

Montenegrin

Turkish

9. **Blog Page.** A JAM stack Created with Gatsby.js, GraphQL and Markdown.
Create blogs with Markdown and fetch and show to UI with Gatsby & GraphQL.

Education

Master of Science, Computer Engineering, Epoka University, Tirana
